HIGHLIGHTS OF QUALIFICATIONS

- Worked with very large (> 1 TB) and complex datasets requiring advanced mathematical analysis.
- Developed state of the art code for solving partial differential equations with high numerical precision.
- Demonstrated creativity by defining novel and innovative metrics (e.g. brane tension as an order parameter, entanglement velocity) playing a central role in 4 research projects.
- Created effective data visualizations (with MATLAB and Mathematica) to present highly abstract concepts such as event horizon evolution, magnet thermalization and quantum anharmonic oscillators.
- Built an SVM classifier for spam filtering, an image compressor using K-means, a rudimentary movie recommender system, and a CNN correctly classifying dogs and cats with 97.9% accuracy.
- Excellent communication skills (guest speaker for 5 radio broadcasts; 9+ years experience as an effective teaching assistant; author of 4 peer-reviewed publications; bilingual in French and English).
- Highly adaptable worker with strong problem solving skills and a very positive attitude.

TECHNICAL SKILLS

- Programming: Python (Numpy, Scipy, Pandas, scikit-learn, Keras, etc.), MATLAB, SQL, C, JavaScript.
- 7+ years of expertise in scientific computing: optimization, numerical analysis, Monte Carlo methods, differential equations, Fourier analysis.
- Machine learning fundamentals: linear/logistic regression, SVM, clustering, PCA, anomaly detection, collaborative filtering, neural networks.
- 2 years of experience using High-Performance Computing resources (WestGrid).
- Proficiency in website scraping with BeautifulSoup.

EDUCATION

PhD, Physics | University of British Columbia, Vancouver, BC

2017

Thesis: *"Numerical Investigation of Spatial Inhomogeneities in Gravity and Quantum Field Theory"*

Application of analytical and numerical methods to study black hole dynamics. Topics covered include holographic superconductors, entanglement propagation, and black hole instabilities.

Relevant course: CPSC 540 - Machine Learning

Deep Learning Specialization | Coursera

2017

- Neural Networks and Deep Learning
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization
- Structuring Machine Learning Projects (error diagnostic, mismatched training/test sets, transfer learning)

Machine Learning Certificate | Coursera

2016

LEADERSHIP & COMMUNICATION

Scientific Communication

- Author of 4 peer-reviewed publications in the Journal of High Energy Physics (see below).
- Award-winning teaching assistant for over 9 years with a track record of near-perfect student evaluations.
- Independently designed and led tutorial sessions in Computational Physics, for which I devised 14 in-depth tutorials and 2 assignments with minimal supervision.
- Guest speaker for five radio broadcasts of scientific popularization, 103.3 FM, Longueuil, QC (2009). Topics included "The Ozone Layer", "Microwaves", "GMOs", "Televisions", and "Glass".
- Presented research work at major undergraduate mathematics conferences (CUMC 2010 Waterloo and CUMC 2011 Quebec City).
- Orchestrated and participated in the undergraduate interns' summer conferences (2010).

Professional Development (Université de Montréal)

- Represented the physics undergraduate student body interests as VP Academic (2009-2011).
- Researched issues and initiated structural changes to the Physics & Mathematics academic program.
- Planned and executed an industrial field trip to Hydro-Québec's Research Institute for 40 physics students to explore potential career opportunities (resulted in obtention of Paul-Lorrain award, 2009).
- Created and directed three successful Talent Shows for the physics department (2008-2011).

HONOURS AND AWARDS

2012:	NSERC CGS D3 Scholarship (highly competitive nationally)
	Four Year Doctoral Fellowship (automatically eligible due to NSERC CGS D3 Scholarship)
2011:	NSERC CGS M Scholarship (highly competitive nationally)
	PSI Full Scholarship (highly competitive internationally)
	FQRNT Scholarship (highly competitive provincially; declined)
2009-2011:	NSERC Undergraduate Student Research Awards
2008-2011:	Full-Tuition Scholarship, Université de Montréal
